

vim setup using vim-plug

how to use

0. need Git installed
1. install Vim/Gvim
2. setup depending on the operating system: see the next sections.
3. start Vim and do the following

```
:PlugUpgrade  
:PlugInstall
```

4. restart Vim

Setup for Windows

1. clone this repo in `$VIM` directory

```
git init  
git remote add origin https://github.com/taekyunk/vim_setup  
git pull origin master
```

Note: to find `$VIM` directory, type `:echo $VIM` within Vim.

Setup for Linux

1. clone this repo into `~/vimconfig`
 2. add symbolic shortcuts
- 2a. using script

```
cd ~  
sh vimconfig/setup.sh
```

2b. manually

```
ln -s vimconfig/.vimrc .vimrc  
ln -s vimconfig/.vim .vim  
ln -s vimconfig/.gvimrc .gvimrc
```
